

Nate Sheridan

Software Engineer

I promise I will break stuff before I make stuff - I enjoy working with all FE/BE technologies, SPA frameworks, and libraries to build interactive web applications that are focused on the user and their overall experience. I always aim to provide a viable and dynamic interface for **any** person to use. I am understanding that the world of software is a field that in order to progress, I must always be learning and adapting my skillset, and aim to learn all I can wherever I am, doing everything I can to broaden my knowledge of how people interact with applications I work on. Let's get making!

Experience

Jay's Valet, Denver - Director of Employee Communications

May 2026 - Current Full-Time Employee

- Manage list of 500+ staff members to organize and coordinate up to 80+ employees for events
- Build and maintain custom tooling
- On board and hire new staff members
- Train field leadership and organize all reporting of events

ServiceLogix, Remote (Denver) - Full Stack Software Engineer (www.servicelogix.com)

January 2022 - August 2025

- Promoted from intern to full-time engineer after initial success with internal tooling.
 - Spearheaded development of a new internal framework to support future product initiatives.
 - Collaborate in daily Agile stand-ups, contributing to sprint planning, architectural decisions, and early-stage discussions around future AI integrations.
 - Delivered enhancements to a custom Single Page Application (SPA) built with vanilla JavaScript, improving performance and user experience with a heavy focus on styling and UX design.
 - Maintained and extended backend services using C#.NET with OracleSQL database integrations.
- Tech Stack: C#.NET 9&5, ASP.NET, Vanilla JavaScript, Vite, Cypress, Oracle SQL, MySQL, Perforce, Azure

Autofoc.us LLC, Remote (Denver) - Founder/Full Stack Engineer (www.autofoc.us)

February 2022 - Present

- Independently designed and built a publicly accessible productivity web app, link shortener, and content management system in one universal web application
 - Contribute consistently to design decisions, UX improvements, and development strategy.
- Tech Stack: Figma, NextJS, Postgres w/ Supabase wrapper, AWS, Github, Adobe CC Suite, Auth0

Jay's Valet, Denver - Account Manager, Shift Manager, Priority Shuttle Driver

August 2017 - Current Random Part-Time Employee

- Account Manager for Cherry Hills Country Club's private VIP club "Club22."
- Lead valet teams (3-20+ staff) at high-profile events and luxury locations including Matsuhisa Denver.
- Managed high-value vehicles daily with precision and accountability.
- Designed and implemented onboarding documentation and surveys to improve team operations.
- Trained new staff and coordinated team logistics during peak operations.

Freelance Computer Repair & Refurbishment Denver - Freelance

April 2020- January 2021

- Operated an independent e-waste recycling and electronics repair side business.
- Refurbished discarded PCs and laptops by repairing hardware and replacing key components.
- Specialized in SSD, RAM, and motherboard upgrades; moderate soldering and fabrication experience.
- Sold refurbished systems at profit through local and online marketplaces.

Educational Projects

Stonki - Solo Project

January 2022

a fintech-inspired portfolio tracker using FinancialModelingPrep's API
Charted live stock data using Recharts, deployed via AWS Amplify

Tech Used: React, REST API, Recharts, AWS

view code on github

Routes - Group Project

December 2021

Developed a medical waste routing system with MapQuest API
Built interactive maps with Leaflet and a GraphQL backend.

Tech Used: React, GraphQL, Ruby, Leaflet, AWS, Heroku

view code on github

Driplist - Group Project

November 2021

Created a cocktail recipe app with user auth and recipe saving features
Used Auth0 for login and React to simplify drink preparation UX

Tech Used: React, REST API, Auth0, AWS Amplify

view code on github

Contact

Skillset

- JavaScript (ES6)
- C# / .Net
- CSS
- HTML
- Git
- API Consumption (WEB/REST)
- CI/CD
- Hardware Knowledge
- Adobe PS, LR, AE CS6
- DNS / Domains
- Postgres, OracleSQL
- AI Agents

Technologies

- React
- Webpack
- SASS, Tailwind
- Express/Node
- GraphQL
- Mocha, Chai, Cypress
- AWS (FE deploy stack)
- Azure
- CPanel
- WordPress
- Vite

Tools

- Figma
- Github
- VSCode/VS2022
- Cursor
- Ollama
- Perforce
- Auth0
- Jira
- Supabase
- Firebase
- Veo, Gemini, AI etc

Education

Turing School of Software and Design
Front-End Engineering
ACCET Accredited Program

Start Date
July
2021

End Date
January
2022
